

TAMANNA ZUBAIRI SANA

E-Commerce Manager

Data-driven **E-commerce Manager and Conversion Rate Optimization (CRO)** specialist with a background in experiment-driven product optimization, user behavior analytics, and software quality assurance within **Shopify-based e-commerce** environments and **broader e-commerce** platforms. Experienced in designing and validating **A/B and multivariate experiments**, identifying UX friction points, and translating behavioral insights into scalable product improvements. Proven ability to analyze customer journeys across Shopify and broader e-commerce funnels and uncover opportunities to improve engagement and conversion performance. Skilled at bridging **product, engineering, design, and growth teams** to implement experimentation-driven enhancements and deliver data-informed product decisions. Adept at combining **analytics, experimentation frameworks, and structured validation processes** to ensure reliable deployment of optimization initiatives and continuous improvement of digital experiences.

EDUCATION

2017 - 2021

BSc Computer Science & Engineering

East Delta University

CGPA: 3.81 / 4.00

2025

International English Language Testing System (IELTS)

Score: 7.0 / 9.0

TRAININGS

Python with Data Science & Machine Learning

The Universe-IT

SQA and Cyber Security

IT Training BD

Youth Leadership Summit (YLS)

BYLC, Dhaka, Bangladesh

Youth for Future

Global Law Thinker Society

LEADERSHIP

President

East Delta University Literary Club

Executive Member

East Delta University Computer Club

Coordinator

East Delta University Literary Club

WORKSHOPS

- Arduino, Raspberry-PI & IoT
- Fundamentals of Python
- Graphics and UI Design
- Theatre & Drama

PROFESSIONAL EXPERIENCE

2022 - PRESENT

ECHOLOGYX LTD

Jumairah Fairmont Trade Centre, 327 Old CDA Avenue, Muradpur, Chattogram

E-Commerce Manager

(2025 - Present)

Conversion focused E-commerce Manager specializing in CRO and experimentation, optimizing user journeys and improving conversion performance through structured A/B testing and insight-driven product decisions.

- Lead **Conversion Rate Optimization (CRO)** initiatives by identifying UX friction points and defining experimentation opportunities across e-commerce funnels.
- Design and validate **A/B and multivariate experiments** to test product hypotheses and improve conversion performance.
- Use behavioral analytics tools such as **Google Analytics, Microsoft Clarity, and Hotjar** to analyze funnel performance and identify optimization opportunities.
- Define **experiment acceptance criteria and QA scenarios** to ensure full coverage of user journeys and edge cases before deployment.
- Managed **Shopify theme customization and landing page** setup to support marketing campaigns and improve user experience.
- Administered **Shopify products and inventory**, optimizing store settings, discounts, and shipping for seamless operations and campaign readiness.
- Collaborate with **developers, designers, CRO specialists, and stakeholders** to translate optimization concepts into technically feasible implementations.
- Deliver **data-driven experiment insights and optimization recommendations** to stakeholders to support product and UX improvements.

Software Quality Assurance (SQA) Engineer (L2)

(2022 - 2024)

Detail-oriented Software QA Engineer experienced in functional, automation, and API testing, ensuring product reliability and high-quality digital experiences.

- Executed **functional, regression, cross-browser, performance, and accessibility testing** to ensure product stability and consistent user experience.
- Developed **structured test cases and QA documentation** to improve testing coverage and product reliability.
- Performed **automation and API testing** using Selenium, Cypress, Postman, and JMeter to streamline testing workflows.
- Supported **experiment and feature validation** by verifying implementation logic and ensuring reliable deployment across different user scenarios.

EXPERIMENTATION & OPTIMIZATION IMPACT

- Executed and validated **50+ A/B and multivariate experiments** across key e-commerce funnels including product, category, and checkout pages.
- Enabled **data-driven product decisions** by identifying UX friction points and conversion bottlenecks through behavioral analytics.
- Provided **optimization insights that informed product, UX, and marketing improvements** across multiple customer touchpoints.
- Strengthened the organization's **experimentation framework** by ensuring robust QA validation and reliable experiment deployment.

SKILLS

- **SQA and Cyber Security**
  - Kameleoon • AB Tasty • Convert • ABlyft
- **Collaboration & Workflow**
  - GitHub • Jira • Trello • ClickUp • Slack • Cursor
- **Data Science & Insights**
  - Exploratory Data Analysis (EDA) • Statistical Analysis
  - Data Preprocessing • Correlation Analysis
  - Trend Identification • Hypothesis-Driven Insights
- **Programming & Data**
  - Python • C • MySQL
- **Analytics Tools & Behavioral Tools**
  - Google Analytics • Microsoft Clarity • Hotjar • Crazy Egg
- **Testing & Automation**
  - Selenium • Cypress • JUnit • TestNG • Postman • Newman • JMeter

LANGUAGES

- English
- Bengali
- Urdu
- Hindi

CERTIFICATIONS & ACHIEVEMENTS

- **Data Analytics: Data, Data, Everywhere,** authorized by **Google,** Coursera
- **Python Data Structures,** authorized by the **University of Michigan,** Coursera
- **Programming for Everybody (Getting Started with Python),** authorized by the **University of Michigan,** Coursera
- **Blockchain Basics,** authorized by the **University at Buffalo, The State University of New York,** Coursera
- **Scholarship Award** for Academic Excellence, **East Delta University (EDU)**

RESEARCH & PUBLICATIONS

Published

- Advancing Federated Learning: A Systematic Literature Review of Methods, Challenges, and Applications - Submitted to IEEE Access
- Sorokh-Poth: A Balanced Bangladeshi Road Vehicle Image Dataset Integrated with a Detection System Based on Deep Convolutional Neural Networks - International Journal of Research Publications, 2023
- Deciphering Minds and Motion: A Unified Exploration of Brain Signal Decoding and Activity Recognition through AI-driven Analysis

Under Review

- A Hybrid Model for Phishing Detection using Convolution Neural Network and Long Short-Term Memory - Submitted to PLOS ONE

Papers Under Preparation

- An Efficient Framework for the Detection and Prevention of Phishing Attack Vulnerabilities using Machine Learning Approach
- Multilingual SMS Spam Detection Using Machine Learning Techniques
- A Novel Deep Learning Based Approach for Graduate Admission Prediction
